

“Coastal Kaleidoscope”

David A. Garcia

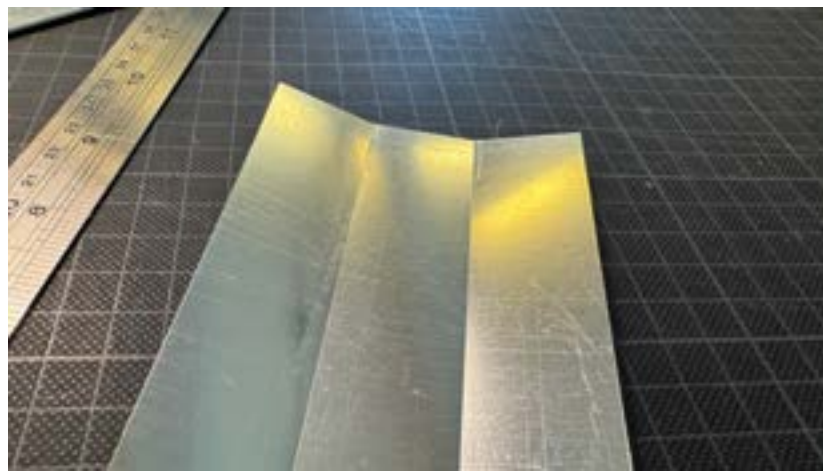

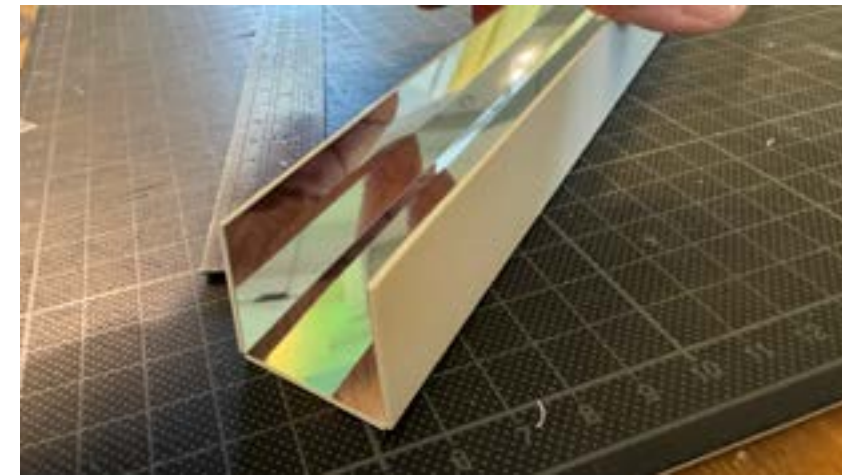

“cut (but not all the way through) three strips on the back of a piece of plastic mirror”

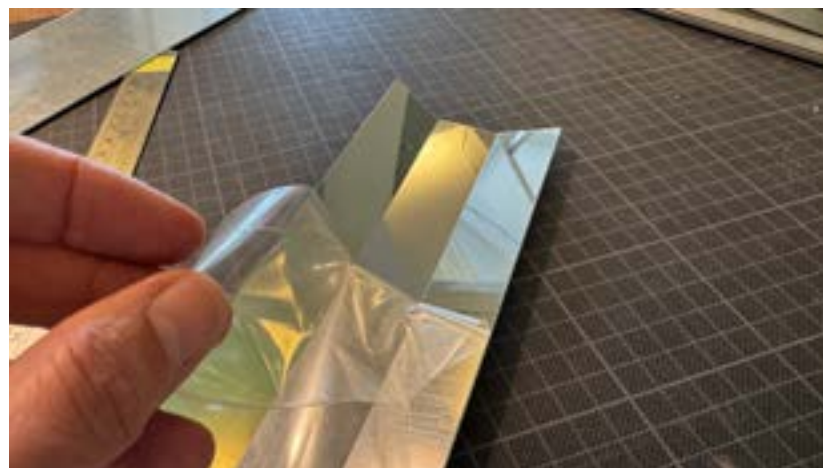

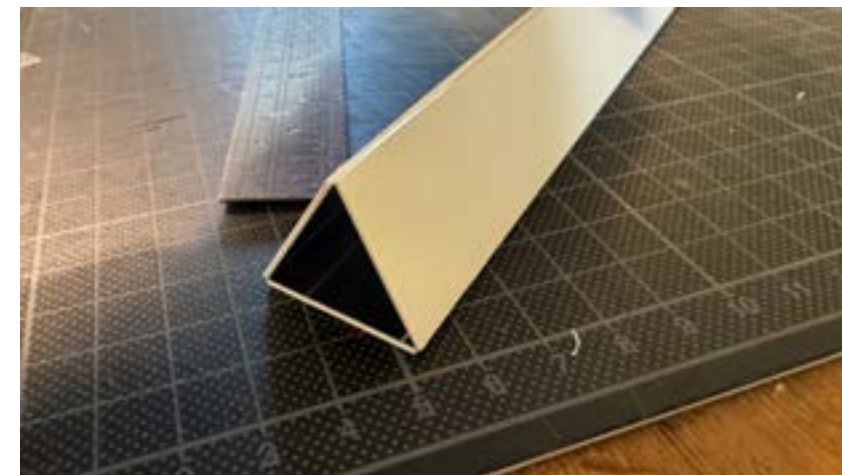

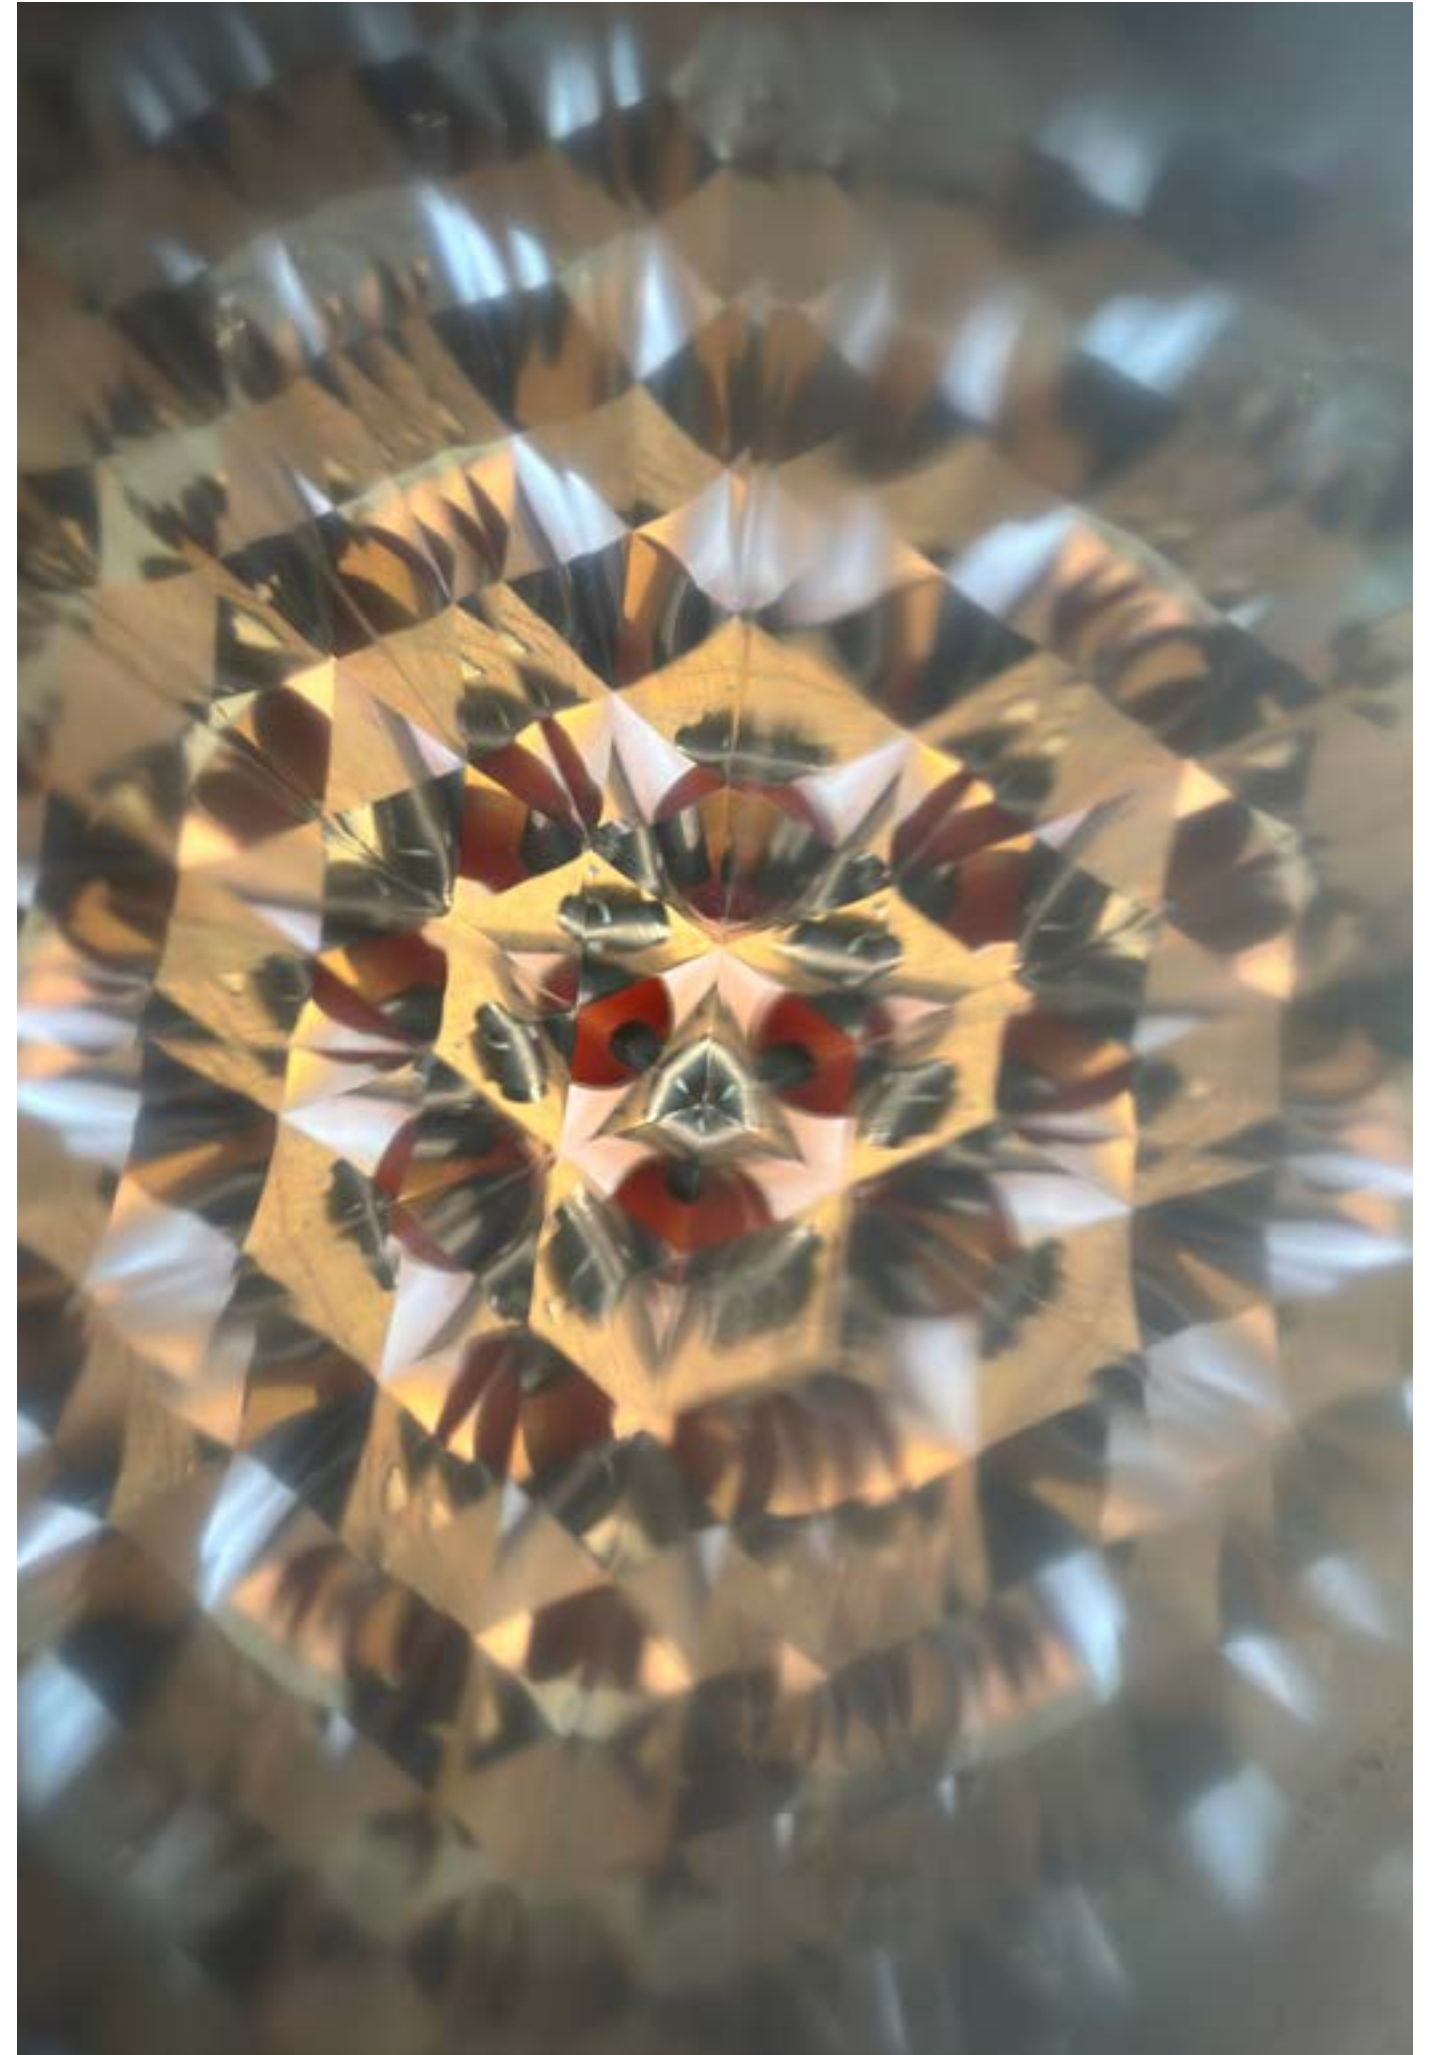

**“...and
cover all
edges
with tape”**

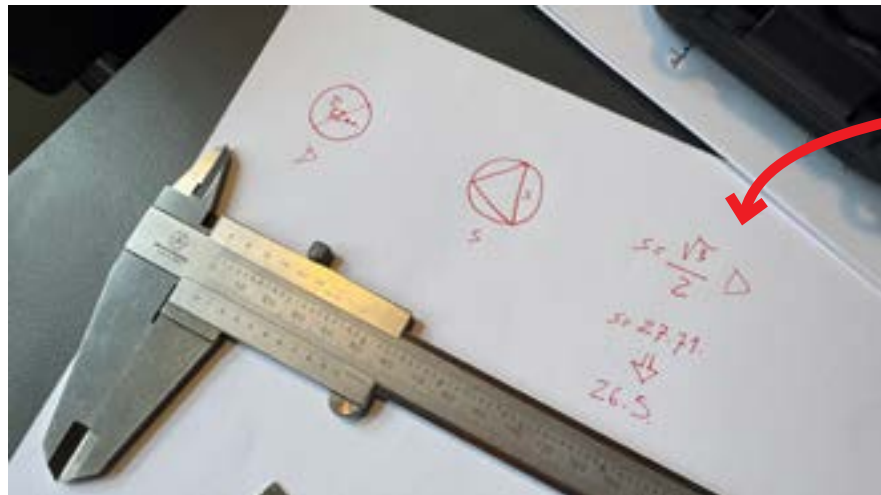

**“fold the
strips
carefully
into a tri-
angular
tube...”**

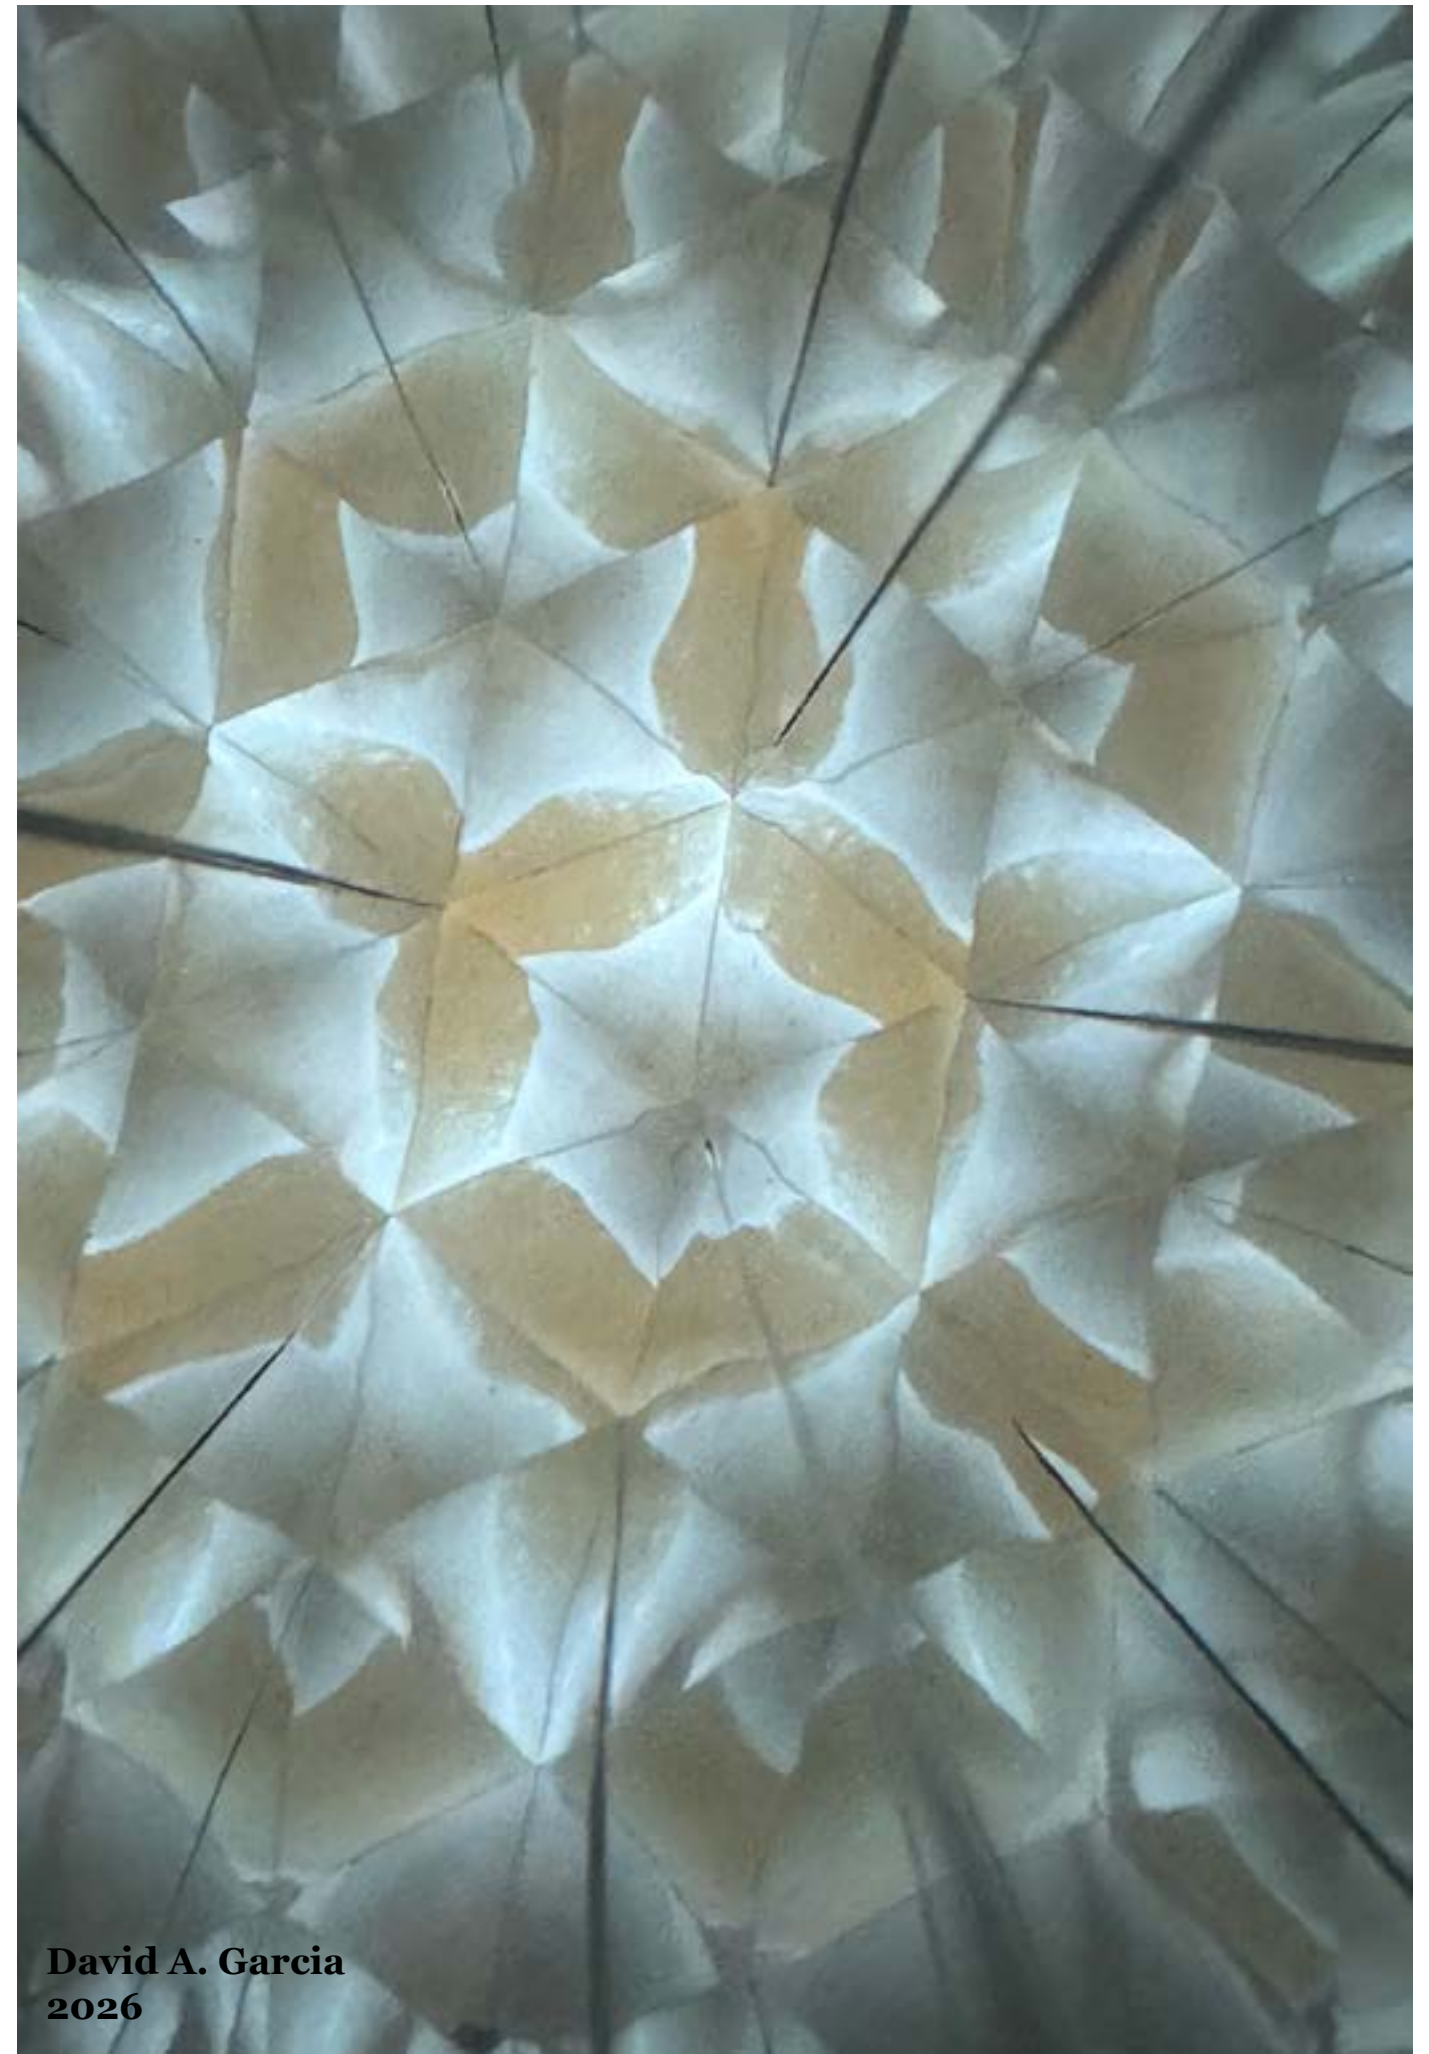

“If you want the kaleidoscope to fit inside a tube, you can practice your maths”

“glue or screw a transparent container in one end..”

**“...fill it with things,
and see what
happens”**

**David A. Garcia
